Licence to download and print this document is given to all purchasers of "Learning Through Music LTD" products only.

Notes for parents and carers

Ask your child to draw round the dotted shapes and add legs to create insects or animals. You could ask for a spider with eight legs, a beetle with six and a centipede with many more!
Alternatively, let your child create strange alien creatures with any number of legs, arms and heads. Encourage counting and opportunities to discuss which creature has more or less body parts.
Making dough creatures can be fun too using cut up drinking straws for legs. For dough recipe see activity page on Kindescope's website. www.kindscope.com/activity.htm

Early Learning Goal

Count reliably up to 10 every day objects.
